

Amber Alert

August 2019 Issue No B107

Chanel Zipped Jacket

This jacket was dry cleaned in perchloroethylene using a delicate process in accordance with the care label, circle P underlined.

If you look at the picture with the original sample against it you may just see that there is a slight difference in colour plus there is also a difference in texture. This is because there was a coating, which is believed to be PU, that has been removed to a greater extent by the perchloroethylene from the surface of the jacket.

"Obviously we cannot say that other items of the same type will have the same problem, or that a different method of cleaning may have had a more satisfactory result, because this was not tested, but we advise caution and that you carry out your own test if you are going to clean this type of garment."
